11th Application:

While Loop:

```
#include<stdio.h>
main(){

    int e , table ;

    e = 10;

    table = 5;

    int i = 1; // starting value

    while(i <= e){ // ending value

        //printf("\n %d " , i);

        printf("\n %d * %d = %d" , table , i , table * i);

        i++;
    }
    int j = 1;
    while(j<=e)
    {
        printf("\n\n %d " , j);

        j++;
    }
}
```
