9th Application:

PAYROLL / SALARY APP:

```c
#include<stdio.h>
main(){

    int Basic , Fuel , H_Rent , Medical , Gross_Sal , I_Tax , Net_Sal;

    printf("\n Enter Basic Salary : ");
    scanf("%d" , &Basic);

    printf("\n Enter Fuel Allowance: ");
    scanf("%d" , &Fuel);

    printf("\n Enter Medical Allowance : ");
    scanf("%d" , &Medical);

    printf("\n Enter House_rent Allowance : ");
    scanf("%d" , &H_Rent);

    Gross_Sal = Basic + Fuel + Medical + H_Rent;

    I_Tax = Gross_Sal * 17 / 100;

    Net_Sal = Gross_Sal - I_Tax;

    printf("\n Basic Salary : %d " , Basic);
    printf("\n Fuel Allowances : %d " , Fuel);
    printf("\n H_Rent : %d " , H_Rent);
    printf("\n Medical Allowances : %d " , Medical);
    printf("\n Gross Salary : %d " , Gross_Sal);
```

```c
        printf("\n I_Tax : %d " , I_Tax);
        printf("\n NetSalary : %d " , Net_Sal);

}
```
