12th Application:

Do While Loop:

```c
#include<stdio.h>
main(){

    int t = 5;

    int i = 1;              // starting value

    do {

    //    printf("\n %d " , i);

        printf("\n %d * %d = %d " , t , i , t* i);

        i++; // iterator or increment or decrement
    }while(i<=10); // ending value

    printf("\n\n");
    int j = 1;

    do {
        printf("\n %d" , j);

        j++;
    }while(j<=10);
}
```
